

# STEP ONE

The screenshot shows a window titled "Create a new account". At the top, there is a grid of email provider logos including Google Mail, Hotmail, Yahoo Mail, AOL, Inbox.com, GMX, Mail.com, Web.de, Freenet.de, t-online.de, Wippies, Onet.pl, Virtual, o2.pl, A&B, and Mail.ru. Below this grid is a search bar containing the text "@gmail, @googlemail". Underneath the search bar is a section titled "Authentication Details" which contains two input fields: "Email Address:" with the value "david.honess@gmail.com" and "Password:" which is empty. At the bottom right of the window is a button labeled "Create".

1. Enter your email address and login password

2. Then press Create

# STEP TWO

Age of Wonders Email Wrapper - david.honess@gmail.com

Accounts | Activity Log | Preferences | About

| Account   | Email Address          | Default |
|---|------------------------|---------|
|  Google Mail | david.honess@gmail.com | Default |

Authentication Details

User name: david.honess@gmail.com

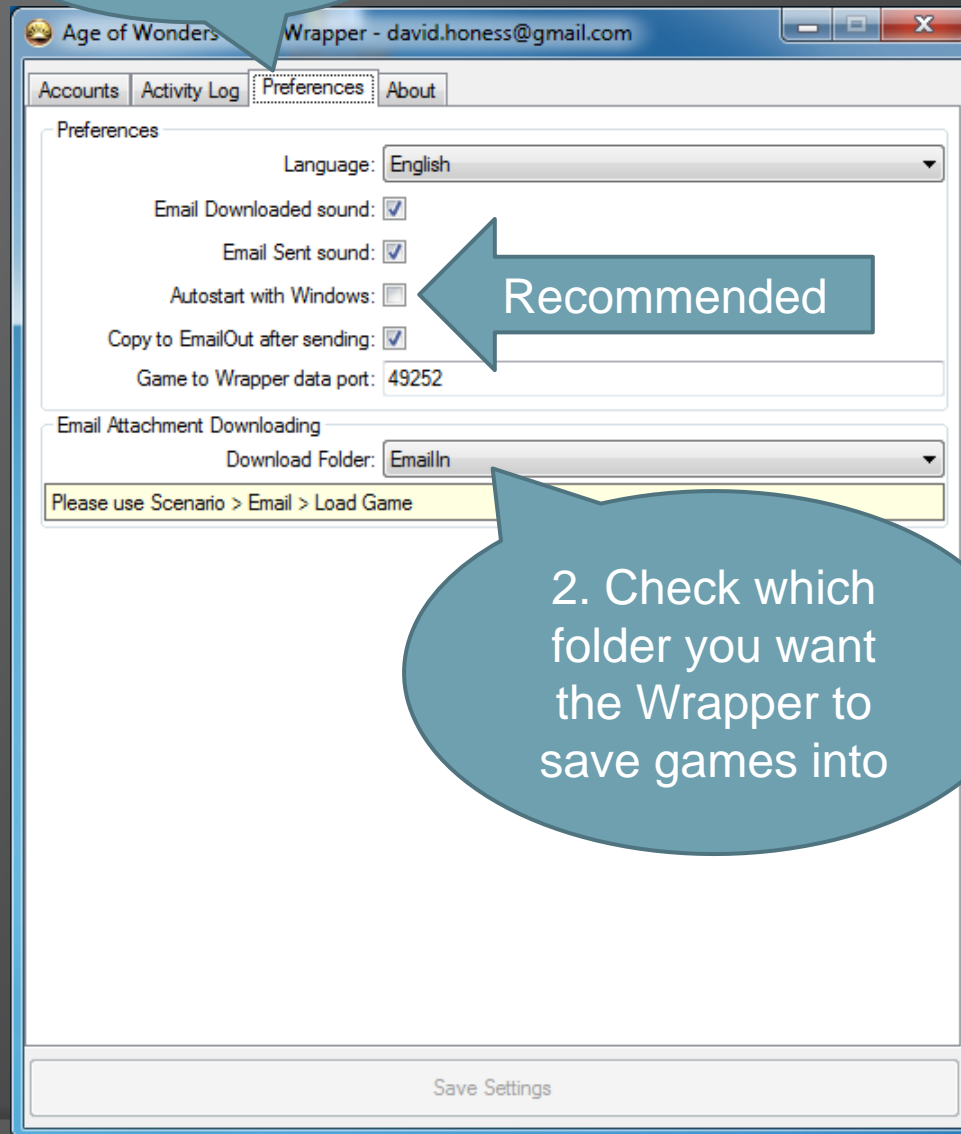

Password: .....

Save Settings

Add more accounts here if necessary

1. Select  
Preferences

# STEP THREE

Recommended

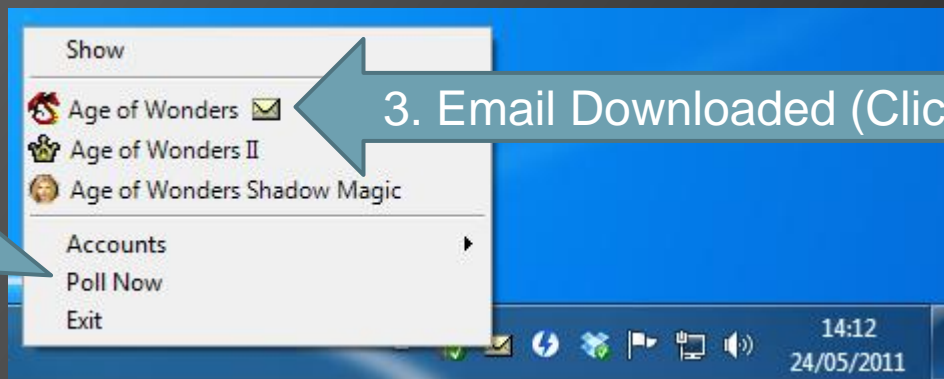

2. Check which  
folder you want  
the Wrapper to  
save games into

# STEP FOUR

1. Right  
click

2. Click  
Poll Now  
to check  
for email

3. Email Downloaded (Click to run game)

If nothing happens when you Poll Now, go  
to the [HELP / CHECKLIST](#) page below.

# STEP FIVE

2. Use Automated

This is the same for Aow, Aow II and Aow SM.

1. Click End Turn as normal

# HELP / CHECKLIST

There are couple of email *evils* that some users can be caught out by, these are fundamental issues with email technology though – so it's probably not your fault!

**Trick: If nothing happens when you Poll Now, just forward the game email back to yourself and try again.** The Wrapper ignores all existing email in your account when you first poll for email. This is necessary to prevent it from downloading all your old game turns that could still be in your Inbox (and also for speed). Future turns should be downloaded first time though.

**Remember:** If your Incoming Email tab has **IMAP** as the Email Type, you must have the emails in the Inbox and they must be marked as Unread. The Wrapper works with unread IMAP email only because of the speed advantage.

**Remember:** If your Incoming Email tab has **POP3** as the Email Type and you use a windows based email client, like **Microsoft Outlook**, you will need to change an option to tell Outlook to leave the messages on the server so that the Wrapper can find them. Search Google if you need to find how to set this. Also applies to any windows based POP3 email client, but don't worry if you always access your email through a browser.

**Remember:** Some email provider services require you to explicitly switch on SMTP (for sending) and IMAP or POP3 access (for receiving). Some email provider services also make you pay, Yahoo Plus for example.

# STILL STUCK?

If you are still stuck, please consult the Wrapper Documentation PDF. This is a very readable and easy to understand manual.

It should contain everything you need to know.

You can also email me, but if you ask me something that is blatantly in the manual I will reply with RTFM! 😊

[david.honess@gmail.com](mailto:david.honess@gmail.com)

Thanks for using the Wrapper!
